# The Security of Downloadable Executable Content:

Past, Present and Future

Chair: Avi Rubin

AT&T Labs

# Panelists

- Ed Felten
- Li Gong
- Jim Roskind
- Peter Neumann

# Questions:

- Which is the best model for the long term?

- Can anything be achieved without military-grade O/S?

- What formal mechansims can we use to analyze new models and languages?

- Is it likely that Felten, Hopwood and others will break every new system that comes out, even if it has a "proof" of security?

- What is the role of hardware (spelled s-m-a-r-t c-a-r-d-s?), if any?
